

# Winter school for higher grades

THE ArcelorMittal Science Centre in Vredenburg is giving all grade 11 and 12 learners an opportunity to refine their first semester performances by attending the Winter School from 27 June to 8 July.

Classes in Maths, Science and English will be offered and will run from 09:00 – 14:15.

Optional tutorial classes will also

be available from 14:15 – 15:00. Tuition is free.

Classes will be held in English and Afrikaans.

Registration forms are available from all the high schools in the Saldanha Bay Municipality area and at the science centre.

Transport on selected routes will be provided. •

The science centre is asking parents to encourage their children to attend regularly once they have registered as lots of preparation is based on the learners' needs.

Also, this curriculum support by the science centre is available for all the learners throughout the year.

For more information, please call Phinah on 022 719 1058.
